

# MANTIS™

INFRASTRUCTURE MAINTENANCE

**201 P**

## Power for Infrastructure

The heavyweight tool carrier for highways, rail, waterways,  
and large-scale verge maintenance.

Power for every environment

With a 200hp high-output engine, the Mantis 201P is engineered for large-scale infrastructure work. From highways and railway to waterways and embankments, it provides the power needed for heavy-duty attachments including reach arms, mowers, snow clearance systems, and sweeping equipment.

## Specification:

- **Engine power:** Deutz 200hp Stage V diesel.
- **Transmission:** Hydrostatic, high-torque drive.
- **Hydraulics:** High-flow circuit for heavy-duty attachments.
- **Operator cab:** ROPS/FOPS certified, 180-degree rotation.
- **Max speed:** 40 km/h transport speed.
- **Dimensions:** 6.0m length / 2.6m width.
- **Attachments:** Reach arm mowers, flail and rotary mowers, snow blowers, ploughs, sweepers.
- **Applications:** Highways, rail, waterways, embankments, large-scale vegetation and snow clearance.
